EDUCATION

Süleyman Demirel University

Computer Engineering 3rd Year Student

2020 - Present

SKILLS

- ASP.NET MVC
- ASP.NET WebForms
- Windows Forms
- Unity
- C#
- MSSQL
- Javascript

LANGUAGES

- **Turkish** *Native*
- **English** *B1 Intermediate*
- **German** *A1 Basic*

INTERESTS

- ASP.NET Technologies
- Artificial Intelligence and the like
- Cycling
- Computer Games
- Playing Guitar
- Reading Books
- Ice Skating
- History, Literature

PROFILE

Hi, I am Atakan, I am studying Computer Engineering at Süleyman Demirel University. I am interested in **ASP.NET Technologies**. I know **ASP.NET MVC, ASP.NET WebForms, Windows Forms, Unity** and **C# Backend** to some extent. I am also working on it to learn **ASP.NET Core Web API**. I also have a certain level of **Python** knowledge. Besides all these, I am interested in artificial intelligence, image processing, machine learning and deep learning. Additionally, I am learning the principles of Design Patterns and Clean Code. I am a self-motivated person in software and technology. I am eager and motivated to take my skills to the next level and make a meaningful impact on the field. I am open to learning new languages and technologies as needed.
I am currently looking for a part-time job or internship and see this as an opportunity to gain experience.

PROJECTS

ASP.NET MVC

- **AldiSatti** *:* https://github.com/AtakanTurgut/aldisatti
It is a shopping site. Users can register. And if they have registration, they can log in. At the same time, they can create their own basket and shop. Managers can perform transactions related to these purchases instantly. Administrators can also see users, categories, products and orders. It can perform operations such as adding, deleting and updating these features.

- **ArabaSizin** *:* https://github.com/AtakanTurgut/arabasizin
It is a car sales/rental site. Users can register. And if they have registration they can login. In addition, they can choose the vehicle they want and access the necessary information. Users can advertise themselves as they wish and benefit from the site. Managers can perform transactions related to these purchases instantly. Admins can also see users, posts, and cars. It can perform operations such as adding, deleting and updating these features.

- **EmlakBizim** *:* https://github.com/AtakanTurgut/emlakbizim

ASP.NET WebForms

- **EmlakWebForms** *:* https://github.com/AtakanTurgut/emlakWebForms
It is a real estate site. Users can register. And if they have registration they can login. In addition, they can choose the house they want and access the necessary information. Users can advertise themselves as they wish and benefit from the site. Managers can perform transactions related to these purchases instantly. Admins can also see users, posts, and homes. It can perform operations such as adding, deleting and updating these features. But the project is in the learning phase, it is not completely finished.

MERN Stack Project
