PROFILE

Hello, I'm Atakan and I have a BSc in Computer Engineering from Süleyman Demirel University. I am an expert in .NET Technologies and have advanced proficiency in **ASP.NET Core Web API** and **ASP.NET Core MVC**. I also have knowledge of **ASP.NET MVC**, **ASP.NET WebForms** and **Windows Forms** within the .NET Framework.

I have knowledge of **MSSQL SMS**, **T-SQL** and **MySQL** and I am also interested in **Kotlin Android** programming. I actively apply **Design Patterns** and **Clean Code Principles** in my work and try to improve myself in this regard. In addition to all these, I am also closely interested in **UI/UX** issues in order to develop **User-Centered** projects. I plan to produce innovative and sustainable projects by integrating process management techniques such as **PLM**, **TRIZ** and **Six Sigma** into my projects.

With my strong passion for software and technology, I am always eager to develop my skills and make meaningful contributions to the field. I am also open to learning new languages and technologies when necessary.

I am currently looking for a full-time job and see this as an opportunity to share my experiences with a team.
